

Prospectus Supplement No. 13
(To Prospectus dated September 10, 2024)

INNVENTURE, INC.

This prospectus supplement updates, amends and supplements the prospectus dated September 10, 2024 (the “Prospectus”), which forms a part of our Registration Statement on Form S-4 (Registration No. 333-276714) and is being filed to update, amend and supplement the information included in the Prospectus with information contained in our Current Report on Form 8-K, which was filed with the Securities and Exchange Commission (the “SEC”) on March 7, 2025 (the “Current Report”). Accordingly, we have attached the Current Report to this prospectus supplement. Capitalized terms used in this prospectus supplement and not otherwise defined herein have the meanings specified in the Prospectus.

This prospectus supplement is not complete without the Prospectus. This prospectus supplement should be read in conjunction with the Prospectus, which is to be delivered with this prospectus supplement, and is qualified by reference thereto, except to the extent that the information in this prospectus supplement updates or supersedes the information contained in the Prospectus. Please keep this prospectus supplement with your Prospectus for future reference.

Shares of our common stock, par value \$0.0001 per share (our “Common Stock”), are listed on The Nasdaq Stock Market, LLC under the symbol “INV.” On March 6, 2025, the closing price of our Common Stock was \$7.93 per share.

Investing in our securities involves risks that are described in the “Risk Factors” section of the Prospectus.

Neither the SEC nor any state securities commission has approved or disapproved of the securities to be issued under the Prospectus or this prospectus supplement or determined if the Prospectus or this prospectus supplement is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus supplement is March 7, 2025.

Innventure Presentation

March 7, 2025

Disclaimer

The material that follows is a presentation ("Presentation") of information about Innventure, Inc. and its subsidiaries (together referred to herein as "Innventure," the "Company," "us," "our," or "we") as of the date of this presentation. The Presentation does not purport to contain all information that may be required or desired by a party interested in investigating the Company, its business or prospects, and it shall not be deemed to be a complete description of the state of affairs of the Company historically, at its stated date or in the future. None of the Company or any of its respective affiliates, officers, directors, employees, representatives or agents make any representation or warranty, express or implied, as to the accuracy, completeness or reliability of the information contained in this Presentation.

This Presentation shall not constitute an offer to sell or the solicitation of an offer to buy any securities, nor shall there be any sale of any such securities in any state or jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state or jurisdiction. No offer of securities shall be made except by means of a written definitive agreement. This Presentation was prepared solely for informational purposes and does not constitute, and is not to be construed as, an offer, or invitation, or solicitation of an offer, to subscribe for or purchase or sell any securities. Likewise, it does not give and should not be treated as giving investment advice, and it has no regard to the specific investment objectives, financial situation or particular needs of any recipient. Neither this Presentation nor anything contained herein shall form the basis of any contract or commitment whatsoever.

Caution Regarding Forward-Looking Information

This Presentation contains forward-looking statements, including statements regarding the Company's, its subsidiaries' or its management's expectations, hopes, beliefs, intentions, plans, prospects or strategies regarding the future, including the anticipated benefits of the technology that its subsidiaries intend to develop and commercialize, growth and performance expectations, the commercialization of products and services, and long-term goals. Any statements contained herein that are not statements of historical fact are forward-looking statements. Forward-looking statements appear in a number of places in this Presentation. In addition, any statements that refer to projections, forecasts or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. Forward-looking statements are typically identified by words such as "anticipate," "believe," "continue," "could," "estimate," "expect," "forecast," "intend," "may," "might," "outlook," "plan," "possible," "potential," "predict," "project," "should," "will," "would" and other similar words and expressions, but the absence of these words does not mean that a statement is not forward-looking. These forward-looking statements are based on the current expectations and beliefs of the management of the Company in light of factors they believe are appropriate in the circumstances. There can be no assurance that future developments affecting the Company will be those that we have anticipated. These forward-looking statements involve a number of risks, uncertainties (some of which are beyond the control of the Company) or other assumptions that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements, including those discussed and identified in the public filings made or to be made with the SEC by the Company, and the following:

- expectations regarding the Company's and its subsidiaries' strategies and future financial performance, including their future business plans, expansion and acquisition plans or objectives, prospective performance and opportunities and competitors, revenues, products and services, pricing, operating expenses, market trends, liquidity, cash flows and uses of cash, capital expenditures, and their ability to invest in growth initiatives;

Disclaimer (cont.)

- operational risks related to the Company's subsidiaries that have limited or no operating history;
- the implementation, market acceptance and success of the Company's and its subsidiaries' business models and growth strategies;
- the Company's and its subsidiaries' future capital requirements and ability to obtain sufficient funding for operations and future growth and to continue as a going concern;
- developments and projections relating to the Company's and its subsidiaries' competitors and industry;
- the risk that the technology solutions that the Company's subsidiaries license or acquire from third parties or develop internally may not function as anticipated or provide the benefits anticipated;
- the ability of the Company and its subsidiaries to successfully commercialize technology solutions in a timely and cost-effective manner or at all;
- the ability of the Company's subsidiaries to scale their operations;
- the ability of the Company and its subsidiaries to establish substantial commercial sales of its products;
- the risk that the launch of new companies distracts the Company's management from its other subsidiaries and their operations;
- the ability of the Company and its subsidiaries to compete against companies with greater capital and other resources or superior technology or products;
- the ability of the Company and its subsidiaries to sufficiently protect their intellectual property rights, and to avoid or resolve in a timely and cost-effective manner any disputes that may arise from time to time relating to their use of intellectual property;
- the risk of a cyber-attack or a failure of the Company's or its subsidiaries' information technology and data security infrastructure;
- the risk that the Company may be deemed an investment company under the Investment Company Act, which would impose burdensome compliance requirements and restrictions on its activities, which may make it difficult to operate or to execute its growth plans;
- limited liquidity and trading of the Company's securities;
- the ability of the Company and its subsidiaries to meet, and continue to meet, applicable regulatory requirements related their businesses;
- the outcome of any legal or regulatory proceedings to which the Company may become a party;
- geopolitical risk and changes in applicable laws or regulations; and
- the possibility that the Company may be adversely affected by other economic, business, and/or competitive factors.

Disclaimer (cont.)

Should one or more of these risks or uncertainties materialize, or should any of our assumptions prove incorrect, actual results may vary in material respects from those projected in these forward-looking statements.

All subsequent written and oral forward-looking statements concerning the Company and the Innventure Companies or other matters addressed in this Presentation and attributable to the Company or any person acting on its behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this Presentation. Except to the extent required by applicable law or regulation, the Company undertakes no obligation to update these forward-looking statements to reflect events or circumstances after the date of this Presentation or to reflect the occurrence of unanticipated events.

Risk Factors

The risks discussed and identified in the public filings made or to be made with the SEC by the Company and those outlined above are certain of the general risks related to the business of the Company and its subsidiaries, and such list is not exhaustive. The occurrence of one or more of the events or circumstances identified as risk factors, alone or in combination with other events or circumstances, may have a material adverse effect on the business, cash flow, financial condition and results of operations of the Company and its subsidiaries. The Company may face additional risks and uncertainties that are not currently known, or that are currently deemed immaterial, which may also impair the Company's and its subsidiaries business, prospects, financial condition or operating results. Potential investors are encouraged to perform their own investigation with respect to the business, prospects, financial condition and operating results of the Company and its subsidiaries.

Market and Industry Data

Certain market, industry and other data used herein have been obtained or derived from third-party sources and publications as well as from research reports prepared for other purposes. Although the information from these third-party sources is believed to be reliable, none of the Company or its management has independently verified the data obtained from these sources, and no assurances can be made regarding the accuracy or completeness of such data. Forecasts and other forward-looking information obtained from these sources are subject to the same qualifications and the additional uncertainties regarding the other forward-looking statements contained herein.

Trademarks

In addition to trademarks, service marks, trade names, copyrights and logos of Innventure and its subsidiaries contained herein, this presentation contains trademarks, service marks, trade names, copyrights and logos of other companies, which are the property of their respective owners. Unless otherwise stated, the use of these other trademarks, service marks, trade names, copyrights and logos herein does not imply an affiliation with, or endorsement of the information contained herein by, the owners of such trademarks, service marks, trade names, copyrights and logos.

Innventure™ – A Technology Commercialization Company

Innventure founds, funds, operates, and scales companies in strategic collaboration with multinational corporations ("MNCs"). We source technology solutions from R&D teams, channel partners, and innovation networks seeking value from their innovations and who believe Innventure's model presents a promising alternative for achieving the full commercial potential of the technology.

A

Who We Are

A company that collaborates with MNCs and seeks to create businesses that we believe have the potential to achieve target enterprise values of \$1B+

B

What We Offer

Valued collaborator to MNCs that commercializes technologies with anticipated market needs, offering strategic benefit to the MNCs upon adoption of the technologies

C

How We Identify Opportunities

Proprietary DownSelect™ analysis has the potential to reduce failure rate and enhance economic return profile

D

MNC Technology Solution Relationships

Extensive pipeline of technologies from relationships with MNCs that have a combined enterprise value of nearly \$242 billion⁽¹⁾ across numerous industries

E

Focus on Growth

Track record of value growth across various proven high demand technologies⁽²⁾

A Innventure™ at a Glance

Innventure founds, funds, and operates companies around transformative, sustainable technology solutions in collaboration with multinational corporations (MNCs), channel partners, or innovation networks.

Leveraging market data from MNCs, Innventure identifies technology solutions that present opportunities to launch businesses that we believe have the potential to achieve enterprise values of \$1B+

Innventure acquires or licenses technology solutions, funds the commercialization, and launches and scales new "Innventure Companies"

Innventure has an established network of MNCs interested in collaborating with Innventure to monetize new technology solutions

Innventure maintains control as part of a "Disruptive Conglomerate Model"

Four companies launched since Innventure's inception: PureCycle Technologies (Nasdaq: PCT), AeroFlexx, Accelsius, and Refinity

	2015	2018	2022	2024	2025+
Innventure Company	 PURECYCLE ⁽¹⁾ NASDAQ: PCT	 AEROFLEXX	 ACCELSIUS	 refinity	New Company #5, #6, ...
Technology	Polypropylene Recycling	Liquids Packaging	Thermal Management	Waste-to-Value Recycling	Technology #5, #6, ...
MNC Collaborator	Procter & Gamble	Procter & Gamble	Nokia	Dow	8 Current MNCs showing technologies to be commercialized with aggregate enterprise value of nearly \$242 billion ⁽²⁾

A Our View of What Differentiates Innventure's Model

	Venture Capital	Traditional Private Equity	MNCs	innventure
Liquidity for Investors	X	X	✓	✓
Investor/LP Time Constraint	Significant	Significant	Limited	None
Ability to Redeploy Cash Flow	X	X	✓	✓
Launched Companies' Expected Success Rate	Low	Medium	Low	High
Operational Expertise	Limited	Limited	Mature products and technology	Early and growth stage, disruptive products and technology
Cost Basis	Low	High / Leveraged	High	Near-Zero

Innventure creates companies that are designed to reduce risk: (i) they serve an expected market need informed by proprietary MNC data, (ii) they own or license developed technology with significant time and capital previously invested by the technology source, and (iii) they have an expected built-in customer channel (via the MNC)

A What Makes Innventure™ Unique

Innventure finds, funds, and operates companies around transformative, sustainable technology solutions in collaboration with multinational corporations (MNCs), channel partners, or innovation networks.

Acquire or license a proven technology⁽¹⁾ that addresses an expected unmet need

Significant monetary and time investment by technology source in each technology

Built-in channel to market through MNC accelerates adoption of technology

PCT⁽²⁾ has long-term supply agreements with P&G and other global partners

Founder stage owner-operators can potentially create substantial financial leverage

29.2X

B Benefits to Multinational Companies

MNCs invest hundreds of billions of dollars annually in Research & Development – much of that is not commercialized

B Innventure's Disruptive Conglomerate Model vs. Venture Model

	Venture Capital Company	innventure
Technology	Creates a new technology and takes all risk that it will ultimately work	Innventure starts with a proven technology ⁽¹⁾ developed by an MNC, channel partner, or innovation network
Funding Profile	Funds riskiest portion of R&D spend, which is the development and validation of the technology	Benefits from the capital and time the technology source has already invested into tech development and validation
Customer Base & Commercialization	Organically builds a customer base from scratch	Expected built-in customer base in the MNC (as well as its peers)

B The Closed Loop Model

Systematic efforts to mitigate risks inherent in creating and growing high growth, disruptive companies

Access Advantage

Access to technology solution that is available through MNC, channel partner, or innovation network

Early Customer Adoption

The MNC is motivated to catalyze early adoption by becoming an early customer and/or facilitate the initial customer base to drive financial and strategic value

Institutional Data Set

Deep MNC market knowledge related to the unmet market need, technology solution, industry value creation, market size, and channels of distribution

Developed Technology Solutions

Funded beyond proof of concept, strong intellectual property strategy and early tailored technical support

Innventure's Closed Loop Model is designed to mitigate risk and serve as a value creation flywheel

B The Innventure™ Strike Zone

Proven Industrial Technology⁽¹⁾

Commercial-grade technology solutions with the potential to enable significant, additional quantifiable value opportunities

Path to Economic Return

Targeting opportunities that we believe have the potential for billion+ dollar outcomes

Risk-Mitigated Business

Seeking proven technologies⁽¹⁾ that have with risks that have been significantly mitigated by MNC partners with benefit of market data

Unmet Customer Need

Leverage MNC data and built-in adoption to confirm market demand and identify early customers, reducing risk for the go-to-market pathway

Innventure's data-centric approach is designed to reduce principal risk to scaling and execution

C Innventure's DownSelect™ Analysis

Seeks to identify a significant unmet market need with a transformative technology solution that generates meaningful economic value (for both NewCo and MNC) and has a derived, strategic path to market adoption through the MNC – completing the Closed Loop Model

Innventure Value Creation

PHASE 1

Opportunity Screen

Screen Four Opportunity Ingredients: MNC collaborator, significant market need, breakthrough technology solution, and strategic business model

PHASE 2

Critical Factor Assessment

Identify, Assess, and Prioritize an Opportunity's Critical Success and Risk Factors and develop a plan for in-depth systematic evaluation and development to quantify value, address critical factors for success of a prospective new business, and mitigate risks

PHASE 3

Comprehensive Quantification

Comprehensive Review Across All DownSelect® Quality Characteristics, with a core focus on quantitative analysis and strategy of the immediate new value created for customers, which leads to the business model and initial strategy

PHASE 4

Strategy & Formation

Recommendation Made to Innventure Board of Directors on Innventure Company Formation

Set the initial strategy, including go-to-market and initial business plan, for the Innventure Company, secure control of the technology via licensing or ownership, and **create the new company**

Newco is positioned for potential value creation

D Technology Pipeline by Phase Since Inception⁽¹⁾

Innventure Value Creation

321

Cumulative number of technologies reviewed based on relationships with MNCs and/or their channel partners since inception

PHASE 1
Opportunity Screen

PHASE 2
Critical Factor Assessment

PHASE 3
Comprehensive Quantification

PHASE 4
Strategy & Formation

- PureCycle
- AeroFlexx
- Accelsius
- Refinity

Pipeline narrowed through DownSelect Quality Scoring*

D Illustrative Innventure™ Company Creation Timeline

Symbiotic relationship with MNCs creates potential value for both parties

Innventure Value Creation

D Risk Considerations and Mitigation

Risk Considerations	Mitigation Strategies
Execution	Seasoned leadership team with entrepreneurial, operational, and capital markets expertise in early-stage companies from inception through commercialization
Adoption	MNCs catalyze early market adoption by becoming initial customer and/or providing channel access
Macro/Market Level	DownSelect assessment conducts deep diligence on the technology solution and the market factors that could lead to its success and early adoption by MNCs
Technology	Access to advanced technology solution with robust patent protection
Origination	Leverage MNC proprietary market knowledge of unmet need

E PureCycle⁽¹⁾ Case Study

PureCycle ("PCT") was the first company launched by Innventure with a \$1B+ enterprise value

Multinational
Corporation

P&G

~\$2.08 Billion
Current Enterprise Value⁽²⁾

Company Description

Patented recycling process removes color, odor and other contaminants from plastic waste feedstock to transform it into Ultra-Pure Recycled Polypropylene ("UPRP") resin with virgin-like properties

PCT plants have long-term supply agreements with P&G and other global partners

PCT expects its recycled polypropylene to **consistently achieve a price premium over virgin polypropylene**

PureCycle, the first Innventure Company, validates the Innventure business model and provides tangible proof point of Innventure's multi-billion-dollar value creation strategy.

Relevant History

Innventure Monetization

Innventure created value by developing holdings that were monetized in connection with a deSPAC transaction that resulted in PCT being a public company with an estimated post-transaction value of approximately \$1.2B. Returns were distributed to shareholders and were subject to their respective lock-ups. Innventure no longer has an economic interest in PCT.

29.2x

PureCycle[®]

E AeroFlexx Case Study

Company Description

Innovative Liquid Package

Revolutionary liquids packaging solution that combines the benefits of both rigid and flexible packaging into a single offering

Sustainable Solution

Sustainability benefits that are expected to eliminate 50-70% of plastic used in an equivalent rigid package, potentially up to 85% less virgin plastic than with recycled content and can be curbside recyclable⁽¹⁾

Health & Safety at the Forefront of Design

Designed with hygiene in mind with tamper proof packaging to keep products safe

Built for E-Commerce Supply Chains

Allows seamless adoption into E-commerce channel for liquid products and addresses a significant supply chain challenge

Fills Market Need

Solves a clear market need for customers and brands while enhancing the overall consumer experience

Milestones

2018	Pilot manufacturing capability launched	2021	First Commercial Line	2023	
P&G develops technology	2018	Recyclability achieved	2022	Curbside recyclable pack available ⁽¹⁾	

Proprietary Integrated Valve

Eliminates the need for discrete closures, removes the need for pumps, and enhances the consumer use experience

Proprietary Air Frame

Provides structural rigidity throughout entire package lifecycle, including end of life collection and sortation

Multinational Corporation

P&G AeroFlexx has exclusive rights to commercialize the technology globally.

E Accelsius Case Study

Company Description

Groundbreaking Two-Phased Technology

Accelsius groundbreaking NeuCool Platform employs a two-phase, direct-to-chip liquid cooling method, **with 49% expected reduction in energy usage⁽¹⁾** vs electricity used for legacy air cooling systems and opportunity to increase the number of servers in racks

Current Technology at Limits

Replaces current air-cooling technology that is approaching its limits and requires a significant amount of unused floor space

Easy Integration

Flexible configurations fit standard server racks & servers agnostic of current datacenter configuration and infrastructure

Multinational Corporation

Nokia

Accelsius Drives Wide Range of Expected Efficiencies

59% 10-year TCO Savings Compared to Air Cooling⁽²⁾

Cooling accounts for **40% of a data center's energy consumption⁽³⁾**

Zero Water Consumption

AI services such as ChatGPT use **.5L of water for up to 50 prompts**

49% Expected Reduction in Energy Usage⁽⁴⁾

Data center electricity consumption was estimated in 2022 to be in the range of 240 to 340 TWh, around 1% to 1.3% of total electricity consumption.⁽⁵⁾

Data center cooling market projected to reach \$16.8B by 2028, with liquid cooling emerging as biggest technology in the sector.⁽⁶⁾

Data Center Electricity Use (MWh) Based on 100,000 sqft Data center

E Refinity Case Study

The Refinity Opportunity

Today, only 9% (or 240M tons/year) of produced plastic is recycled, with most ending up in landfills or as litter.⁽¹⁾

Refinity is focused on the other 91%.

Refinity is licensing patented Fluidized Bed Process Technology licensed from VTT Technical Research Institute of Finland. This technology is expected to convert a wide range of abundant, low-cost mixed plastic waste that would otherwise be landfilled or incinerated to desired drop-in chemical products – at a significantly higher yield. We believe that Refinity's plastic recycling technology will enable true global circularity.

Multinational Corporation

Dow

Our collaboration with Dow is expected to help us optimize our operations for integration with typical petrochemical plant operations. We plan to explore siting and plant integration options, seeking to leverage Dow's infrastructure and lower our overall costs.

Expected Benefits at Every Phase of Recycling

  		
Intake	Conversion	Output
- Utilizes plastic waste that would otherwise be landfilled or incinerated - Minimal sorting required	- Proprietary application of fluidized bed technology - Anticipated high-yield conversion of waste to valuable drop-in chemicals	- Tunable output should produce sustainable liquids or gases - Replaces fossil feedstocks at petrochemical plants
Benefit	Benefit	Benefit
- Abundant access to new sources of plastic feedstock - Significantly lower cost than current feedstock	- Lower operating costs expected - Lower capital costs expected - Anticipated 2-3X higher yield vs. conventional pyrolysis	- Tunability expected to allow creation of whatever is in highest demand - Flexible plant siting should drive scalability

E Timeline for Innventure™ Companies

Repeatable methodology and track record of building highly valued companies within several years of launch

E Sustainability as a Value Driver

Helping MNC partners unlock economic value while achieving sustainability targets

Economic Value Driver

Material sustainability issues create new markets and are primary drivers of revenue, cost, and risk that impact value creation for long-term business performance

Agnostic Advantage

Evaluating MNC technologies for their potential to address unmet need, rather than starting with a particular lens on which issues to solve, allows for broader value creation potential

Core Model Strength

We believe continuous sustainability assessment, management, adherence and improvement processes strengthen Innventure's core model to systematically build transformative businesses

Responsibility

Innventure helps MNC partners meet their sustainability goals by building companies around technology solutions

Economic viability is a key component of sustainability

Evidence of our ability to operate sustainably

PureCycle⁽¹⁾ – Purifies and recycles post-industrial and post-consumer polypropylene waste back to a like virgin grade polymer, usable across a broad range of applications and markets

AeroFlexx – May use up to 85% less virgin plastic compared to standard rigid bottles to create a liquid packaging solution that is curbside recyclable⁽²⁾

Accelsius – Cooling solution designed to maximize capacity, reduce operating costs, and increase energy efficiency for server, switching, and edge environments

Refinity – Mission to scale and commercialize technologies aimed at converting mixed waste, including hard-to-recycle plastic waste, to petrochemical feedstocks. Sustainable chemicals produced by Refinity will serve as direct replacements for existing fossil fuel-based feedstocks.

E Leadership – Executive Committee

Bill Haskell
Chief Executive Officer

Bill serves as Chief Executive Officer for Innventure. Previously, he was a co-founder and President of XL TechGroup that created the foundational business building methodology upon which Innventure is based. Bill has worked with the key principals of Innventure for over 20 years. He has also served as a public company CEO and has been a director of over a dozen private and public companies. Prior to joining Innventure in 2021, Bill was a partner at a boutique investment bank focused on converting private companies into employee-owned enterprises. He has over 30 years of experience in company creation and development. In addition to being a Director of Innventure, Bill serves as Chairman of Accelsius and is a Director of Aeroflex – two partnership companies created by Innventure. Bill holds a B.S. degree in engineering and conducted post graduate work in applied mathematics at Iowa State University.

David Yablunsky
Chief Financial Officer and
Chief Accounting Officer

David's finance career spans over 30+ years with large public and private multinational corporations. Prior to Innventure, David was Chief Financial Officer of Embraer Aircraft Holding, Inc., the U.S. subsidiary of the Brazilian aerospace and defense conglomerate Embraer, SA. He was also CFO and Board Member of Embraer Executive Aircraft, Inc. and Board Member of Embraer Defense and Security, Inc. Over his career David has worked for large MNCs such as Ford Motor Company, Ford Credit, Office Depot, Oxbow Carbon LLC, and Embraer. Before his career in finance, David served nine years in the U.S. Navy and worked in the Pentagon on General Colin Powell's staff. David holds a B.S. in Mathematics from the U.S. Naval Academy and an MBA in Finance from the University of Maryland. He also holds a graduate-level certificate in Accounting from the Harvard University Extension School and has completed the Advanced Management Program at the Harvard Business School.

Mike Otworth
Co-founder, Executive
Chairman

Mike is an Innventure Co-founder and currently serves as Executive Chairman of the Board and in an international role at Innventure. Mike was the Founding CEO and Chairman of the Board of PureCycle (PCT), an Innventure Company, from 2015-2022. Mike and team took PCT from early-stage concept to operational pilot, fully funded first commercial plant, followed by a successful public offering in March of 2021. Prior to Innventure, Mike served as President and Founding Partner of Green Ocean Innovation for six years as a company that provided technology sourcing, innovation strategy, and development services to Lilly/Elanco Animal Health. Mike also served as Vice-President and Founding CEO of multiple start-ups at XL TechGroup. Mike began his career on Capitol Hill working as a legislative aide and committee staff member in the U.S. House of Representatives.

Dr. John Scott
Co-founder, Chief Strategy
Officer

John is an Innventure Co-founder, member of the Investment Committee, and serves in a strategy role at Innventure. Prior to co-founding Innventure, John served as Founder and CEO of XL TechGroup where he developed the DownSelect Method that Innventure uses today to vet disruptive technologies from top Multinational Corporations (MNCs) and their associated business opportunities. John also served as an academic scientist at numerous universities and government labs including the Universities of Maryland, North Carolina and Arizona, as well as the NASA Goddard Space Flight Center. He earned his Ph.D. in Physics and Astrophysics from the University of Arizona and has published over 60 academic papers.

Roland Austrup
Chief Growth Officer

In addition to his Innventure role, Roland serves as Chairman of WaveFront Global Asset Management Corp., a Toronto-based global hedge fund company he co-founded in 2003. Roland is also a founding Director of Envest Corp., a downstream energy company, and an Advisory Board member of both the Master of Quantitative Finance program at the University of Waterloo and First Trades Capital, a Canadian private equity firm. Roland was an Investment Advisor with BMO Nesbitt Burns Inc. and began his career as a Commodities Broker with ScotiaMcLeod Inc., hedging commodity price risk for corporate clients. Roland holds a BA with Honors from the University of Western Ontario.

E Leadership

Suzanne Niemeyer
General Counsel

Suzanne serves as General Counsel at Innventure. She has over 25 years of experience providing legal counsel to public and private companies. She has experience advising private equity firms and technology companies with respect to the evaluation, structure and negotiation of complex investment and commercial transactions, as well as regulatory and corporate matters. Most recently, she was the General Counsel and Corporate Secretary for Magis Capital Partners, an operational venture capital company with a focus on fintech solutions. Previously, she served as a Managing Director, General Counsel and Corporate Secretary of Actua Corporation, a publicly traded company that acquired and operated a portfolio of software-as-a-service businesses. Suzanne began her career at Dechert LLP, a global law firm. She holds a B.A., cum laude, from Duke University and a J.D., cum laude, from Georgetown University Law Center.

Lucas Harper, CAIA
Chief Investment Officer,
Investment Committee

Lucas is a member of the Investment Committee and serves as Chief Investment Officer of Innventure and brings over 20 years of experience in managing investment teams, building companies / business units and the seeding and buildout of multiple investment platforms and investment products for both large institutional investment and start-up organizations. Prior to joining Innventure, Lucas held a Principal role at Santa Monica Capital Group as well as serving as President & CEO of Ocean Avenue Investment Partners. He earned his B.A. in Economics from the University of California at Santa Barbara, is a Chartered Alternative Investment Analyst (CAIA) and currently holds a Series 7 and Series 63 license.

Colin Scott
Senior Vice President,
DownSelect®

Colin leads Innventure's DownSelect process – our proprietary, systematic methodology to evaluate opportunities to commercialize transformative, but proven, technology solutions that meet significant market needs; select the most viable opportunities; and use the analysis to construct a roadmap to launch and develop Innventure Platform Companies that execute those plans with a high probability of success. Previously, he held executive positions in private equity growth and startup ventures. Colin spent the first 10 years of his career with XL Tech Group (XLTG), where he managed the DownSelect process before becoming a member of serial management teams for various XLTG NewCos in renewable fuels and medical diagnostics. Colin earned an MBA in Strategy and Entrepreneurship from UNC Kenan-Flagler Business School, and he graduated with a major in Electrical Engineering and minor in Physics from Duke University.

E Innventure's Economic Sustainability Playbook

Process for systematically scaling our businesses

INNVENTURE COMPANIES

AeroFlexx Overview

Strong Value Proposition to Customers

Designed for E-Commerce & Retail

- ISTA-6 approved for shipping liquids via e-comm channel.
- Pak eliminates damages from breakage/handling and saves costs from elimination of prep & materials

Flexible Manufacturing

- No molds enables rapid adoption at a lower cost vs. traditional bottles
- Get to market quickly for consumer feedback
- Capital efficient deployment with turnkey solutions for filling

Logistics Improvements

- Ships flat before fillings
- Simplifies sourcing with consolidated supply chain
- Reduces transit damage & shipping losses

Brand Differentiation

- Wrap around canvas in full color to showcase brands
- Custom shapes & sizes capabilities

Superior Sustainability Benefits

Virgin Plastic Avoidance

Significant reduction by using up to 85% less virgin plastic compared to rigid bottle/cap alternatives

Curbside Recyclability

Curbside recyclable where plastic bottles are accepted⁽¹⁾

Package Circularity

Package can incorporate up to 50% recycled content without compromise

Lifecycle Analysis

By eliminating excess packaging material in e-commerce, we believe AFX can deliver less waste to landfills, GHG reduction, and less water use versus typical plastic bottle packaging

AeroFlexx Executive Leadership

Andrew Meyer

Chief Executive Officer

Andrew is the CEO of AeroFlexx and Serial CEO for Innventure. He brings with him extensive experience in entrepreneurial environments having spent the last 15 years within 4 different venture-backed technology start-ups that included value-add exits such as an IPO and a trade sale to a strategic partner.

Jim Traut

VP, Finance and Accounting

Jim brings with him extensive experience within finance and enterprise risk management environments. Before AeroFlexx, he co-founded and served as CEO of a cloud-based motion graphics video production start-up. Jim also worked for the H. J. Heinz Company for 24 years in various global strategy, accounting, risk, control, audit, due diligence, and ethics leadership roles.

Cedric D'Souza

Chief Technology Officer

Cedric is the CTO of AeroFlexx and an entrepreneurial leader with an insatiable passion for leveraging technology to transform global supply chains. Cedric has over 28 years of experience, leading culturally diverse organizations and project teams in Asia, Europe, Latin America, and North America. Over his career he has lived in 4 different countries.

Veronica Sebal

VP, Quality Control

Veronica brings over 18 years in Quality and Manufacturing. Veronica's focus is establishing AeroFlexx's Quality Systems, Control, and Assurance Plans. She is responsible for the Food Safety System development, implementation and compliance to regulatory requirements.

Accelsius Overview

Target Market

Data Centers

Accelsius increases compute density while reducing the power usage in a **data center liquid cooling market that is set to top \$15B over the next five years (2024-2028)** ⁽¹⁾

AI Cooling

AI is driving 14GW of additional power needs through 2030⁽²⁾ – the market opportunity for Accelsius is huge, using **two-phase direct-to-chip liquid cooling for ultra high heat fluxes**.

Embedded Semiconductors

Increased software stack (including AI) requires higher performance chips, a rapidly growing market as AI grows

Transformative Technology

Direct-to-Chip

Cooling is in direct contact with heat source, compatible with existing and new installations

Two-Phase

Transition from liquid to vapor ensures larger heat dissipation

Accelsius Executive Leadership

Josh Claman

Chief Executive Officer

Josh has over 30 years of leadership experience driving growth in Fortune 100 companies such as Dell and NCR and as a CEO in startups with successful exits. He is passionate about businesses that make a positive impact to our world.

Richard Bonner, Ph.D.

Chief Technology Officer

Dr. Bonner has over 18 years of industrial experience as a heat transfer researcher and advanced thermal product developer. He is a recognized expert in two-phase cooling and thermal issues as they relate to the energy-water nexus.

Jeff Taus

VP of Engineering

Jeff brings extensive server systems engineering expertise from Dell. He has over 25 years of leadership experience delivering products in enterprise computing and in the appliance and automotive industries, telco-focused edge servers, and in hyper-scale server deployments.

Robert Wehmeyer

Chief Financial Officer

Robert has over 25 years of financial leadership experience with companies such as Dell and National Instruments. Prior to Dell, Robert worked at Westinghouse Motor Company, Presidio Enterprises, and Arthur Andersen.

Matt Cruce

Chief Supply Chain Officer

Matt brings expertise in managing complex global supply chains with experience in Dell's server division where he successfully minimized lead times and ensured parts availability. Prior to Dell, Matt worked at Lockheed Martin.

Refinity Overview

Company Description

On Dec. 18, 2024, Dow and Innventure announced plans to collaborate to develop and commercialize new waste-to-value technologies. The collaboration aims to enable globally scalable, cost-effective conversion of mixed wastes to petrochemical feedstocks.

Refinity plans to work directly with Dow to scale and commercialize technologies aimed at converting mixed waste, including hard-to-recycle plastic waste, to petrochemical feedstocks. The sustainable chemicals produced by Refinity will serve as direct replacements for existing fossil fuel-based feedstocks.

Multinational Corporation

Dow

Dow will provide technical resources to support the engineering development and deployment of new waste-to-value processes and work with Refinity to identify preferred sites for future commercial plant operations.

Refinity Technology licensed from VTT

- Patented fluidized bed (FB) conversion technology licensed from VTT Technical Research Institute of Finland (VTT)
- VTT's pilot plant is available for optimization and engineering studies

Expected Differentiation from Incumbent Technologies

Focus on using low-cost, abundant plastic waste that is currently landfilled or incinerated, with minimal sorting

Proprietary application of fluidized bed technology to convert plastic waste to drop-in chemicals at high yield

Process tuning should allow flexible operation to produce sustainable liquids or gases that replace current fossil feedstocks and feed petrochemical operations

innventure

Refinity Executive Leadership

Chief Executive Officer – Bill Grieco

Grieco previously served as Innventure's Chief Technology Officer and is an entrepreneur, innovator, and business leader who has spent the last 25 years leading R&D and commercialization organizations in the chemical, pharmaceutical, clean tech, and specialty materials industries. He holds a Ph.D. and Master's degree from M.I.T., and a Bachelor's degree from Georgia Tech, all in chemical engineering.

Chief Operating Officer – Adam Javan

Javan has been a Serial CXO for Innventure and is a seasoned executive with over 25 years of running businesses at blue chip companies as well as startups. Prior to Innventure, Javan served as Chief Strategy Officer of a biotech startup company, leading to a successful public offering in 2021. Javan has an MBA from the University of Michigan's Ross School of Business and a Master's degree in chemical engineering from the Royal Institute of Technology, Stockholm, Sweden.

Chief Technology Officer – Ignasi Palou-Rivera

Ignasi is a leader in technology development and commercialization with over 25 years' experience in process development and scale-up, and techno-economic and sustainability assessment of new technologies in the chemicals and fuels industries. Prior to joining Refinity, Ignasi was the Executive Director and CTO of the RAPID Manufacturing Institute®, where he led the institute's successful funding renewal with a new focus on process technologies for sustainability and circularity in the process industries. Ignasi also teaches at the Illinois Institute of Technology in Chicago as an Adjunct Professor. He has a PhD in Chemical Engineering from the University of Wisconsin-Madison and an Engineer's degree from the Universitat Politècnica de Catalunya (Barcelona Tech).

Creating Companies to Transform Tomorrow

APPENDIX

DownSelect™ Quality Scoring

Helps prioritize evaluation and development of opportunities by integrating information in an iterative loop across five key interconnected factors

Capital

Rigorous financial analysis that determines key milestones and capital requirements that we believe are necessary to execute and create significant value

Timeline

Timeline to market and scale that meets return goals and has development plan in place

Market

Comprehensive assessment of market size, competitive dynamics and overall attractiveness

Value

Quantification of the expected immediate, new economic value created for potential customers, especially strategic value for MNC partner, which is critical and can predict early adoption

Advantage

Look for a breakthrough solution with competitive advantages that we expect can be maintained over the long term to position the company for higher probability for success
